RESEARCH INTERESTS

My current interests revolve around developing hybrid statistical and symbolic models that can perform higher-level reasoning by leveraging background knowledge. I am deeply motivated by interdisciplinary efforts and I am a believer of the deep potential impacts of the joint efforts of symbolic reasoning and probabilistic modeling in the field of Artificial Intelligence.

EDUCATION

Doctor of Philosophy, Computer Science **Arizona State University**, Tempe, AZ
Dissertation Title: Knowledge and Reasoning for Image Understanding 2014-2018
Advisors: Prof. Chitta Baral, Dr. Yezhou Yang
GPA 4.0 (out of 4.0)

Master of Engineering, Computer Science **Indian Institute of Science**, Bangalore
Dissertation Title: Generic Incremental K-Means Clustering 2009-2011
Advisor: Professor M. Narasimha Murty
GPA 7.3 (out of 8.0), 2nd in Class

Bachelor of Engineering, Computer Science **Jadavpur University**, Kolkata
CGPA 8.87 (out of 10), 7th in Class 2005-2009

PROFESSIONAL EXPERIENCE

Nov 2021 – Present	Assistant Professor (Grade I), IIT KGP Computer Science
Feb 2020 – Nov 2021	Postdoctoral Researcher, Microsoft Research India
Sep 2018 – Feb 2020	Research Scientist, Adobe Research India
May 2017 – Aug 2017	Research Intern, Verisk Analytics, New Jersey
May 2015 – Aug 2015	Research Intern, IBM Research Lab, India
Dec 2011 – Jul 2014	Specialist Software III, Strand Life Sciences Pvt. Ltd., India
Jul 2011 – Nov 2011	Senior Software Engineer, Yahoo R&D India

TEACHING EXPERIENCE

Assistant Professor, Department of Computer Science, IIT Kharagpur 2021 - Present

- Spring 2023: **CS60092** Information Retrieval (72 students), **CS19003** PDS Lab
- Autumn 2022: **CS10003** Programming and Data Structures Theory (**196** students), **CS19003** PDS Lab (99 Students)
- Spring 2022: **CS60092** Information Retrieval (70 students), **CS19003** PDS Lab (92 Students), **CS60010** Deep Learning (PGDBA) (with Prof. Sudeshna Sarkar)

Teaching Assistant, Department of Computer Science, Arizona State University 2014 – 2016

- Fall 2015 and 2016: CSE-576 Natural Language Processing (100 students), Spring 2016: CSE-471 Introduction To Artificial Intelligence (100 students), Spring 2015: CSE-310 Data Structures and Algorithms (150 students)

Fellowships, & Academic Achievements

S.No	Name of Award	Awarding Agency	Year
1	Google Cloud Credits Award (USD 5k)	Google India	2022
2	University Graduate Fellowship (USD 4k)	Arizona State University	2018
3	University Graduate Fellowship (USD 2.5k)	Arizona State University	2017
4	University Graduate Fellowship (USD 2k)	Arizona State University	2016
5	CIDSE Doctoral Fellowship (USD 15k)	Arizona State University	2014
6	MHRD Scholarship	MHRD, India	2009
7	GATE CS All India Rank 15	GATE 2009	2009
8	WBJEE Engg Rank 105	WBJEE 2005	2005

RESEARCH GRANTS

- Learning from Rules and Data for Image Analytics - SERB SRG (INR 26.5L, Sep '22)
- The Role of Feedback in Vision-Language enabled Embodied Agents towards Application to Disaster Management - IIT KGP FSRG (INR 25L, Approved Jan 2023, Sanctioned Mar 2023)
- Toloka AI Annotation grant USD 300, Jan 2023

PROFESSIONAL SERVICES

- Organizer
 - CVPR 2022: Open-Domain Retrieval Under a Multi-Modal Setting* (proposal accepted). (with colleagues from Arizona State University, FAIR, DeepMind, Microsoft Azure, IDIAP)
 - IndoML 2021 & 2022: Second and Third Edition of Indian Symposium on Machine Learning (with colleagues from IIT Gandhinagar, IIT KGP, Google Research, Univ. Warwick; <http://indoml.in/>).

- CIKM 2021: Knowledge Injection in Neural Networks (with colleagues from Intel Labs, University of College London, Arizona State University; <https://sites.google.com/view/kinn2021/>)
- IJCAI 2021: Is Neuro-symbolic SOTA still a myth for Natural Language Inferencing (with colleagues from IBM Research, KU Leuven, MSR India, UT Austin; <https://nsnli.github.io/>)
- KR 2018: Integrating learning of Representations and models with deductive Reasoning that leverages Knowledge (<https://sites.google.com/view/r2k2018/home>)
- Panelist: IJCAI 2019 Doctoral Consortium Career Panel
- Senior PC Member: AAAI (2023)
- PC Member: ECAI (2023), ICLR (2023), ACML (2022), ARR, EMNLP, ACL, AAAI, IJCAI (2020, 2021, 2022, 2023); NAACL, EACL (2021), IEEE MASS 2022
 - Workshops: MathAI4ED Workshop NeurIPS 2021, MathAI Workshop (NeurIPS 2022, ICLR 2021), LANTERN-COLING (2020, 2021), Cognitive Vision 2019 (ACS at MIT)
- Conference Reviewer: ICRA (2020), IJCAI (2017, 2016)
- Journal Reviewer: ACML Journal Track, IEEE TIP, AIJ, CVIU, The Visual Computer, Robotics and Autonomous Systems (RAS), Pattern Recognition, Neurocomputing

PROJECTS (During PostDoc)

Natural Language Inferencing: Evaluation and Enhancement

Advisors: Dr. Monojit Choudhury

Microsoft Research India

The aim is to propose fine-grained evaluation of Natural Language Inference systems across well-defined Linguistic and Logical capabilities. Through extensive evaluation, we aspire to expose if Neural Network-based systems trained using the current data-driven paradigm is fundamentally insufficient across certain reasoning capabilities, and whether Neuro-symbolic mechanisms can step in to fill the void.

Interactive Evaluation and Explanation

Collaborators: Dr. Monojit Choudhury, Dr. Amit Deshpande

Microsoft Research India

Interactive prover systems provide a framework where verifier and prover interact to find a proof. Such interactive protocols may inspire human-machine interactions to find related errors of language models based on a set of given errors, behavioral performance (such as CheckList report-card) and the model API. Similar interaction can be enabled to find post-hoc example-based explanations.

Symbolic Reasoning abilities of Deep Neural Networks

Collaborators: Dr. Navin Goyal

Microsoft Research India

Automated Theorem Proving and symbolic Mathematics tasks presents very specific well-defined challenges. For example, a step in an integration may involve finding a sub-expression to operate, finding the next operation, and executing the operation on a mathematical expression to output new expression. Transformers and Graph Neural Nets have performed impressively, but there is too much to learn about its strengths and shortcomings. The goal here is to extensively evaluate the state-of-the-art architectures on synthetic symbolic tasks and propose informed enhancements based on the evaluation.

PROJECTS (During PhD)

Understanding images and videos using a combination of Computer Vision, Statistical and Logical Reasoning

Advisors: Prof. Chitta Baral, Dr. Yezhou Yang

Arizona State University

Collaborator: Prof. Yiannis Aloimonos

University of Maryland, College Park

i) Solving Image Riddles using Vision and Reasoning, ii) Visual Question Answering using Deep Learning and Probabilistic Soft Logic, iii) Image Caption Generation Through Knowledge Graphs from Images, iv) Integrating Spatial Knowledge for Visual Reasoning

Compositional and Generative modeling of Images from text

Advisors: Dr. Yezhou Yang

Arizona State University

Collaborator: Dr. Maneesh Kr. Singh

Verisk Analytics, New Jersey

The goal of the project is to learn a generative model of natural images that abides by properties of compositionality with respect to an input condition (text or features).

Building a Knowledge Parser for Formal Representation of English Text

Advisor: Prof. Chitta Baral

Arizona State University

Parsing Natural Language Text and Creating a Knowledge Graph using a combination of Rule-based and Machine Learning Techniques.

Integrating Statistical and Logical Approaches in Recognizing Social Constructs from Textual Conversation

Advisor: Prof. Chitta Baral

Arizona State University

Our goal was to recognize high-level social constructs such as Leadership and Status from textual conversation using an approach that integrates statistical methods and symbolic logic based methods.
